

Environmental Policy

Macmahon recognises its responsibility to protect the environments in which we operate. We are committed to preventing pollution, minimising adverse environmental impacts, fulfilling our compliance obligations and continually improving our environmental performance.

Environmental considerations form part of how we plan our work, make decisions and deliver services. Our approach reflects the nature and scale of our activities and the environmental conditions in which we operate.

We are committed to:

- Maintaining and continually improving our environmental management systems, certified to ISO 14001.
- Fulfilling applicable environmental laws, approvals, licence and permit conditions, contractual requirements and other binding obligations.
- Understanding and managing the environmental aspects, impacts, risks and opportunities associated with activities we control or influence.
- Integrating environmental considerations into planning, design, procurement, project delivery, operations and rehabilitation.
- Preventing pollution and minimising emissions, waste, land disturbance and the inefficient use of energy, water, materials and other natural resources.
- Considering climate change, biodiversity, ecosystem health and resource availability where relevant to our activities and decisions.
- Establishing measurable environmental objectives aligned with our significant impacts and business priorities.
- Monitoring environmental performance and using the results to guide decisions and improvement.
- Working constructively with clients, regulators, communities and other relevant stakeholders.
- Continually improving our environmental management practices and outcomes.
